

Ⓐ Dense update at $20\times$

all coordinates receive the step
Mean4 0.340 | collapse: yes

Ⓑ Dynamic Advantage Spine

per-tensor top 40% of pre-mask AdamW update

support refreshed every optimization step

SCHEMATIC — dot positions are illustrative, not measured coordinates

Ⓒ Observed at the tested limit

coordinates retained	39.3%
update energy retained	85.0%
support Jaccard	0.600 ± 0.010
Dense $20\times$	0.340 $\rightarrow$ 0.445

Mean4 gain vs dense $20\times$: +0.105
